The Demorchid

Créée par Jayfa en 2023, cette MOC est la rencontre inattendue entre une orchidée papillon et le célèbre Démogorgon. Inspirée par la pièce-fleur d'un set LEGO consacré à Stranger Things, il en reprend la forme pour lui donner un motif imitant l'orchidée papillon du set officiel LEGO. De là est née cette étrange créature florale et monstrueuse à la figure d'orchidée papillon qu'on lui connait.

Un build alternatif ?

Contrairement aux idées reçues de par son apparence, cette MOC n'a jamais eu pour base le sublime set LEGO de l'orchidée papillon. Réalisable avec un total de 401 pièces, le Demorchid n'a que très peu de pièces communes avec l'orchidée malgré ses 608 pièces.

Le nombre de pièces n'est d'ailleurs pas représentatif de la difficulté de la MOC !

En publiant sa création, Jayfa a confié craindre que des entorses aux règles puristes de la communauté LEGO ne nuisent à la reconnaissance de son travail.
